Mycro

Our protocol to connect people unleashes the power of local communities

This is Mycro — Simply getting the job done

Vision

We have made it our task to protect the most valuable gift life offers people: TIME. Time connects us all irrespective of our origin or social rank, it is limited and finite. We cannot retrieve or prolong time. In today's world, our time is mostly controlled externally - by our jobs, our customers, our social obligations. We believe that every person has the right to be in control of their own time. It is our vision to create an equilibrium between time and money with a global and decentralized peer-to-peer network for simple jobs. Everybody should choose what they do, when and for whom they work and what their time is worth.

Why blockchain?

Our main advantage is the real-time focus of jobs in our network as well as the use of the blockchain. The distributed ledger allows us to minimize the management costs and fees, build a new layer of trust and ensure immutable reviews in the network for full transparency.
